Research Seminar Series 2021/22 #8

19 January 2022 (Wednesday) 1:00 - 2:00 p.m.
Face-to-face (A506, CIHE) / Join on ZOOM
Chairperson: Dr. CHAN Kit Sze Amy, Acting Director of Research Office

AI, Interdisciplinarity, and Transformation of the Society

**Prof. CHAN Hing Hung Anthony,
Dean of School of Computing and Information Sciences**

Abstract

Artificial Intelligence has already been used in so many different areas such as business, translation, music, medicine, health care, education, social service, government, hotel management, and practically everything that its uses are increasing being experienced in daily life. It is anticipated that the majority jobs in 10 years have not been invented today.
This talk will introduce AI in layman terms including how to appreciate and take advantage of the use of AI. It then discusses how it will impact job functions, how it may impact education, and how one may prepare for a better future.

Biography

Anthony had experienced both industry and academia environments. He had conducted industry research at AT&T Bell Labs, served as professor at University of Cape Town, and changed back to industry research at Huawei Technologies in USA before joining CIHE. He has authored/co-authored 250 conference and journal papers, a research handbook, several book chapters, and over 30 US patents. He had been a Distinguished Speaker in 3 societies in IEEE and had delivered 20 keynotes/invited talks and over 40 conference tutorials.
