

Research Seminar Series 2021/22 #9

9 March 2022 (Wednesday) 1:00 -2:00 p.m.

Join on ZOOM

Chairperson: Prof. CHAN Sin-wai, Acting Vice-President (Research and Technology) and Professor-cum-Dean, School of Humanities and Languages

Interdisciplinary Research - Opportunities and Challenges

Dr. TSE Kai Wing Anfernee, Assistant Professor, Department of Health Sciences

Abstract:

Areas of research are dynamic - continually emerging, melding, and transforming. Interdisciplinary research is a mode of research by teams or individuals that integrates information, data, techniques, tools, perspectives, concepts, and/or theories from two or more disciplines or bodies of specialized knowledge to advance fundamental understanding or to solve problems whose solutions are beyond the scope of a single discipline or area of research practice. This speech will discuss some key skills and share personal experiences in interdisciplinary research and publishing regarding the new challenges that researchers are facing: (1) How to conduct interdisciplinary research more efficiently; (2) How to publish papers on interdisciplinary journals; (3) How to communicate with readers who might have different research backgrounds.

Biography:

Dr Anfernee Kai-Wing TSE is Assistant Professor in Department of Health Science at CBCC. Before joining CBCC, he had worked as Assistant Professor(Research), Associate Professor(Research) and Assistant Professor at HKBU and SUSTECH-Shenzhen and UIC-Zhuhai respectively for 10 years. He received his PhD in City University of Hong Kong and moved to Tampa-USA as a postdoc fellow at USF/Moffitt Cancer Center. His current research areas include pharmacology and biomolecular probes studies using interdisciplinary approaches and methods in the areas of biological chemistry, medicinal chemistry, molecular biology, and chemical biology.
